

## Data Processing Services Disclosure Statement

FANUC hereby discloses the following information regarding international access to and transfer of data in connection with our data processing services.

### 1. Legal jurisdictions applicable to the ICT infrastructure

The legal jurisdictions applicable to the ICT infrastructure used in FANUC's data processing services are as follows.

Service Name	Legal jurisdictions applicable to the ICT infrastructure
ZDT Cloud Service	United States

### 2. Measures to Prevent Access or Transfer by International Governmental Authorities

- **Technical Measures:** Technical measures include data encryption, access control mechanisms, and regular security audits.
- **Organizational Measures:** FANUC has defined internal protocols for handling access requests from governmental authorities and conducts employee training to ensure compliance with these procedures.
- **Contractual Measures:** FANUC has established a contractual obligation to notify its customers in the event of access requests from governmental authorities.
