

Discover the new generation of the M-710 robot series M-710iD/70

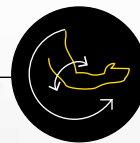

**VERY COMPACT TURNING
CYCLE THANKS TO FULL
STRAIGHT POSITION**

**EASY MOUNTING IN
VARIOUS POSITIONS AND
FLIP OVER CAPABILITY FOR
ENHANCED FLEXIBILITY**

**PAYLOAD: 70 KG
REACH: 2104 MM**

**CURVED J2 ARM AND
INTEGRATED SERVICES TO
REDUCE INTERFERENCE
CONTOURS**

The new *iD* generation

Efficient and powerful

- Optimised weight/payload ratio while retaining the proven M-710 basic design
- Curved J2 arm minimises interference, reducing the risk of collision with surrounding obstacles and improving access
- Fully enclosed design ensures a better protection against liquids and dusts, protecting all sensitive components such as motors, encoders, reducers, cables, etc.
- Optional palletising mode available for linear movement through the singularity
- Powerful performance with R-30iB Plus robot controller in standard A-Cabinet size, programmable with intuitive Touch Teach Pendant
